MATCHBOOK · WEEK 5 · NOVEMBER 2–6, 2026

Respect and Responsibility

Four school days (no school Tuesday, November 3). Respect you can see and responsibility you can count on, in every space at school.

Week 5 · Teacher delivery guide

November 2–6, 2026 has four school days: Monday, Wednesday, Thursday, and Friday. There is no school for students on Tuesday, November 3, so Tuesday's Picture of the Day does not run this week. Morning Spark and Ember carry the same through-line as Morning Meeting: respect and responsibility. Spark keeps its fixed format rotation: Monday Check-In, Wednesday Zoom In, Thursday Would You Rather, and Friday Wonder, followed by the Time for Friday Cypher slide.

Spark leads straight into Morning Meeting

Monday, Wednesday, and Thursday Spark end on a hand-off slide that names that day's Morning Meeting lesson (Respect Is Something You Do, Own It, Fix It, and Respect and Responsibility Everywhere) with a button that opens your band's Morning Meeting deck. Grades 2–3 rooms see two buttons: grade 2 uses the K–2 lesson and grade 3 uses the 3–5 lesson.

Preserve the daily routines

Arrival at 7:15. Spark is a 3–5 minute independent task; then K–2 read and grades 3–8 use IXL. In the 2–3 deck, grade 2 reads and grade 3 uses IXL.

The day’s IXL codes are on the slide, top right, from IXL Week 10 (November 2–6). Announcements are around 7:37, followed by a reveal of two minutes or less. Morning Meeting starts at 7:45; on Friday, advance to Time for Friday Cypher and students report to the hallway once the announcement is made.

Use day keys 1–4 (Mon, Wed, Thu, Fri), arrows, bilingual read aloud, Repeat aloud for late arrivals, and Week view. Wednesday’s reveal zooms out before the answer appears; reduced-motion mode reveals immediately. Thursday votes start at zero; explanations matter more than vote totals.

Ember: 2:05 seated pack-up, 2:08 watch and settle, 2:13 reflect, then seated waiting. Keep the existing release order and times on the rail. Chromebook stays closed on the desk until the group is called; return it to the numbered slot, then leave. No lining up. Use the board’s breathing fallback if streaming fails.

Equity sticks, talk moves, and LiveSchool

Every reveal follows Show, Think (ten silent seconds), Call (one or two equity sticks), Talk (30-second turn and talk if time allows). The daily keys below give the exact cold-call question and stem for each band. Talk moves: “Say more.” “Who can add on?” “What did your partner say?” This is LiveSchool Store week: award points during the work period for the respectful and responsible choices students name, said out loud: “Respectful: Amara let her partner finish before she spoke.” “Responsible: Dante cleaned his spot without a reminder.” Never award points for being quiet or finishing first.

Respect and privacy

Monday check-in slips stay private; the counselor collects them by 10:00 a.m. Feelings and readiness are information, not behavior grades. All week, students talk about their own choices or the examples on the slides, never a classmate’s behavior. If a student names a classmate, redirect in one calm sentence (“We only talk about our own choices.”), continue, and follow up privately. Any report of teasing or bullying is handled under campus reporting procedures the same day.

When behavior gets in the way

Correct privately and briefly, with proximity and the expectation: “Do Now first, then IXL.” Offer a frame instead of an explanation to a student who has not started. Do not hold a student out of the reveal or Morning Meeting to finish the Do Now, and do not use LiveSchool deductions for Level 1 behavior.

Grades K–1 · Daily teaching key

Monday November 2

Spark task: Weather pictures; private slip; optional adult check-in. Reveal: a respectful good morning.

Reveal / key: This week we practice respect and responsibility. Say good morning to someone near you, or wave.

Differentiate / facilitate: Privately point or circle; an adult can scribe. Do not interpret a feeling from behavior. Reveal: model a wave and a calm “good morning”; both count.

Equity stick (after 10 seconds of think time): “Show me a wave. Who can say good morning in a calm voice?” **Turn-and-talk stem:** “Good morning, ___!” (or a wave)

Ember video bridge: Breathe in and fill up like a balloon. Breathe out slowly. Stay in your seat. (Balloon)

Reflection: Draw one way you showed respect today. I showed respect when I ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student’s own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Wednesday November 4

Spark task: What might this be? Look at the colors and shapes. Draw your guess.

Reveal / key: A friend holding the door! Holding the door helps friends walk in safely. That is respectful.

Differentiate / facilitate: Accept any guess with a clue (a hand, a red door). After the reveal, practice a “thank you” for the door holder together.

Equity stick (after 10 seconds of think time): “What clue did you see?” **Turn-and-talk stem:** “I see a ___.”

Ember video bridge: Rest like a starfish in your chair. Breathe slowly, then draw. (Starfish)

Reflection: Draw how you helped fix a mistake or a mess. I helped fix ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student’s own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Thursday November 5

Spark task: Would you rather hold the door for a friend or say thank you when someone holds it for you? Point to your choice.

Reveal / key: Both are respectful! Holding the door and saying thank you both show respect.

Differentiate / facilitate: Both answers are right. Practice holding an imaginary door and saying “thank you” together.

Equity stick (after 10 seconds of think time): “Which one did you pick? Show me with your hand: A or B.” **Turn-and-talk stem:** “I pick ___.”

Ember video bridge: Breathe gently and let your body rest. You may close your eyes or look down. (Your Little Star)

Reflection: Draw a good choice you made in the hallway, at lunch, or at recess. At ___, I ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Friday November 6

Spark task: I wonder: one friend picks up trash. What will the next friend do? Draw what happens next.

Reveal / key: When one friend makes a good choice, other friends often copy it. You can start a good choice!

Differentiate / facilitate: Accept any drawing of a helpful choice. Act out picking up and passing on the good choice.

Equity stick (after 10 seconds of think time): "What will the next friend do?"
Turn-and-talk stem: "The next friend will ___."

Ember video bridge: Wiggle a little in your seat, then flop and rest. Then draw your picture. (Wiggleflop)

Reflection: Draw a good choice a friend made this week. My friend ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Grades 2–3 · Daily teaching key

Monday November 2

Spark task: Weather pictures plus one ready move; private slip. Reveal: one respectful thing to do today.

Reveal / key: This week is about respect and responsibility. Pick one respectful thing you will do today: listen, use kind words, or keep your hands to yourself.

Differentiate / facilitate: Grade 2 circles pictures; grade 3 finishes the sentence. Accept listening, kind words, or safe hands.

Equity stick (after 10 seconds of think time): “What is one respectful thing you will do today?” **Turn-and-talk stem:** “Today I will ___.”

IXL codes on the slide: Grade 3: Math FLQ XR6 · Reading CXN 2K7. Grade 2 reads a book.

Ember video bridge: Let the rainbow waterfall wash the day away. Breathe and rest in your seat. (Rainbow Waterfall)

Reflection: When did you show respect today, even when it was hard? I showed respect when ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student’s own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Wednesday November 4

Spark task: Zoom in. What do you think is happening? Write a guess and one clue that helped you.

Reveal / key: A student is holding the door so classmates can walk into class. Walking on the right and holding the door are respectful, responsible hallway choices.

Differentiate / facilitate: Grade 2 draws; grade 3 writes a guess and a clue. Connect to today’s Morning Meeting: owning our choices in every space.

Equity stick (after 10 seconds of think time): “What clue helped you guess?” **Turn-and-talk stem:** “I think ___ because I see ___.”

IXL codes on the slide: Grade 3: Math 7GW · Reading SVF. Grade 2 reads a book.

Ember video bridge: Watch how the friends work out sharing. Breathe calmly, then reflect. (Mine!)

Reflection: Write about a time you owned a choice. What did you do next? I owned it when ___. Then I ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Thursday November 5

Spark task: Would you rather earn a LiveSchool point for walking in the hallway or for cleaning the lunch table? Tell why.

Reveal / key: Both help other people! Walking keeps everyone safe. A clean table is ready for the next class. Responsible choices help the whole school.

Differentiate / facilitate: Grade 2 points and says; grade 3 writes a reason. Count votes, then name who each choice helps.

Equity stick (after 10 seconds of think time): "Which did you pick, and who does it help?" **Turn-and-talk stem:** "I pick ___ because it helps ___."

IXL codes on the slide: Grade 3: Math S7G · Reading DL5. Grade 2 reads a book.

Ember video bridge: Count slowly with your breath. Stay seated and let your body settle. (Cosmic Counting)

Reflection: Which space at school was easiest to be responsible in today? Which was hardest? Easiest: ___. Hardest: ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Friday November 6

Spark task: Wonder: if one student holds the door, what might happen next? Draw or write what comes after.

Reveal / key: Good choices spread. People often copy what they see. You can start the chain today.

Differentiate / facilitate: Grade 2 draws the chain; grade 3 writes two steps. Name it: one choice can start a chain.

Equity stick (after 10 seconds of think time): “What comes after the door is held?” **Turn-and-talk stem:** “Next, ___.”

IXL codes on the slide: Grade 3: Math 8KJ · Reading F6X. Grade 2 reads a book.

Ember video bridge: Rest in the magic treehouse. Breathe slowly, then write. (Magic Treehouse)

Reflection: Name one respectful or responsible choice you will keep doing next week. Next week I will keep ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student’s own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Grades 4–5 · Daily teaching key

Monday November 2

Spark task: Energy scale 1–5; one small move; optional adult check-in. Reveal: one respectful or responsible move before lunch.

Reveal / key: This week: respect and responsibility. Your energy is information. Name one respectful or responsible move you will make before lunch.

Differentiate / facilitate: Energy is information, not a grade. Push for an observable move (“push in my chair,” “let my partner finish”).

Equity stick (after 10 seconds of think time): “What respectful or responsible move will you make before lunch?” **Turn-and-talk stem:** “Before lunch, I will ___.”

IXL codes on the slide: Grade 4: Math 5P2 QHB · Reading E9T YZB; Grade 5: Math HUJ HHN · Reading ETU RAE.

Ember video bridge: Put one worry on the bye bye boat and let it float away. Stay seated and breathe. (The Bye Bye Boat)

Reflection: Describe one moment today when you disagreed respectfully, or could have. I disagreed by ___. Next time ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student’s own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Wednesday November 4

Spark task: Infer what is happening from two details. After the reveal, explain which detail best supports your inference.

Reveal / key: A student holds the door while classmates walk on the right into Room 63. The sign and the arrow show the hallway routine; holding the door is a choice no one required. That is respect in action.

Differentiate / facilitate: Push for two details (the arrow, the sign, the hand on the door). Celebrate a revised inference.

Equity stick (after 10 seconds of think time): “Which detail best supports your inference?” **Turn-and-talk stem:** “The detail ___ supports my inference because ___.”

IXL codes on the slide: Grade 4: Math C9H · Reading EV2; Grade 5: Math FAA · Reading GSX.

Ember video bridge: Notice the movies in your mind, then come back to your breath. Then reflect. (Movies in My Mind)

Reflection: Think of a mistake from today. What would owning it and fixing it look like? I could own ___ and fix it by ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Thursday November 5

Spark task: Would you rather be recognized for a responsible choice with a shout-out in front of the class or a quiet thank-you from a teacher? Explain your reasoning.

Reveal / key: Both count. Some people like public praise; others prefer private. Respectful recognition fits the person, and the choice matters more than who sees it.

Differentiate / facilitate: Accept either side with a reason. Connect to LiveSchool Store week: points recognize choices, not volume.

Equity stick (after 10 seconds of think time): "Which did you choose, and what is your reason?" **Turn-and-talk stem:** "I would rather ___ because ___."

IXL codes on the slide: Grade 4: Math SZJ · Reading XA7; Grade 5: Math 2L3 · Reading D83.

Ember video bridge: Switch your muscles on and off in your seat. Then let your body rest. (On & Off)

Reflection: Did you act the same in every space today? Give one example. In ___ I ___, and in ___ I ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Friday November 6

Spark task: Wonder: how could we find out whether one respectful act makes others more likely to act respectfully? Name what you would watch for and count.

Reveal / key: Watch one spot, like the door at arrival, for five minutes. Count respectful acts before and after someone starts holding the door. Keep the place and time the same. One week of data is a start, not proof.

Differentiate / facilitate: Look for a countable behavior and two constants (place, time). Note that one week is not proof.

Equity stick (after 10 seconds of think time): “What would you count, and what would you keep the same?” **Turn-and-talk stem:** “I would count ___ and keep ___ the same.”

IXL codes on the slide: Grade 4: Math PFV · Reading 5AS; Grade 5: Math 6BH · Reading BME.

Ember video bridge: Twist and turn gently in your chair. Then breathe and write. (Twist and Turn)

Reflection: What choice from this week set a good tone for others? Explain the effect. When I ___, it helped ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student’s own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Grades 6–8 · Daily teaching key

Monday November 2

Spark task: Ready level 1–5; emotion vocabulary; one controllable action. Reveal: one choice in your control that shows respect.

Reveal / key: This week: respect and responsibility. Your starting line is yours to own. Name one choice in your control that will show respect today.

Differentiate / facilitate: Keep it about the student's own action. Accept private written answers; volunteers share.

Equity stick (after 10 seconds of think time): "What choice in your control will show respect today?" **Turn-and-talk stem:** "Today I will show respect by ___."

IXL codes on the slide: Grade 6: Math RLZ 2HT · Reading A9H; Grade 7: Math ZFM DJ8 · Reading QQS; Grade 8: Math TYZ P5W · Reading XZG.

Ember video bridge: Follow the guided practice to find a calm place. You may simply observe. (Learn How to Find Peace)

Reflection: Where did tone or body language change a message today? What did you notice? I noticed ___ when ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Wednesday November 4

Spark task: Make a claim about what is happening and why it matters. Name two observations and one thing the crop cannot tell you. Revise after the reveal.

Reveal / key: A student holds the door while classmates walk in on the right. No adult is in the frame: the routine runs because students choose it. Small choices no one requires set the tone of a hallway.

Differentiate / facilitate: The crop shows walking students only; the reveal adds the door holder and the missing adult. Discuss why unrequired choices matter.

Equity stick (after 10 seconds of think time): "What could the crop not tell you, and how did the reveal change your claim?" **Turn-and-talk stem:** "At

first I claimed ___. After the reveal, ___."

IXL codes on the slide: Grade 6: Math JSZ UKD · Reading CMA; Grade 7: Math VVS N7G · Reading VQC; Grade 8: Math DYW · Reading 2NV.

Ember video bridge: Breathe in a box: in, hold, out, hold. Stay seated, then reflect. (Box Breathing)

Reflection: Describe a time intent and impact did not match. What would a repair include? Intent: ___. Impact: ___. Repair: ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Thursday November 5

Spark task: Would you rather be known as someone who is respected or someone who is respectful? Can you have one without the other? Defend your answer.

Reveal / key: Most people earn lasting respect by being respectful, especially when it costs them something. Respect that comes from fear or popularity does not last. Both sides have a point; your evidence matters.

Differentiate / facilitate: Push for a counterargument. Keep examples general; no one names a classmate.

Equity stick (after 10 seconds of think time): "Which did you choose, and can you have one without the other?" **Turn-and-talk stem:** "I would rather be ___ because ___. You can or cannot have one without the other because ___."

IXL codes on the slide: Grade 6: Math 9AF NAF · Reading D9L; Grade 7: Math ENH · Reading PJ5; Grade 8: Math BVQ · Reading AAR.

Ember video bridge: Use the short practice to settle your attention. Then write. (Find Your Focus with this Mini Meditation)

Reflection: Rate your standard in one space today. What one move would raise it tomorrow? In ___ I was a ___. Tomorrow I will ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Friday November 6

Spark task: Wonder: why do people act differently when they think no one is watching? Give one reason and one way a community can make the right choice easier.

Reveal / key: People act on habits, pressure, or what they think they can get away with. Clear routines, recognition like LiveSchool, and peers who set the tone make the right choice the easy choice.

Differentiate / facilitate: Push past "they get away with it" to habits and peer tone. Connect to Friday Cypher recognition.

Equity stick (after 10 seconds of think time): "What is one reason, and one way a community can help?" **Turn-and-talk stem:** "One reason is ___. A community can ___."

IXL codes on the slide: Grade 6: Math KE2 · Reading 7U7; Grade 7: Math KJ8 · Reading KUB; Grade 8: Math D45 · Reading VEC.

Ember video bridge: Let the day unwind. Breathe comfortably or observe, then reflect. (Let's Unwind)

Reflection: What tone will you set next week, and where will people see it? Next week I will set the tone by ___ in ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.
