MATCHBOOK · WEEK 6 · NOVEMBER 9–13, 2026

Reset and Return

Five school days. Every behavior has a root, every step is a chance to reset, and returning to learning is always the goal.

Deliver this week

Week 6 · Teacher delivery guide

November 9–13, 2026 has five school days. Morning Spark and Ember carry the same through-line as Morning Meeting: Reset and Return, the classroom response process every teacher now uses. Spark keeps its fixed format rotation: Monday Check-In, Tuesday Picture of the Day, Wednesday Zoom In, Thursday Would You Rather, and Friday Wonder, followed by the Time for Friday Cypher slide.

Spark leads straight into Morning Meeting

Monday through Thursday Spark end on a hand-off slide that names that day's Morning Meeting lesson (What Gets in the Way of Learning; The Steps: Warning, Seat Change, Reflection; Reset and Write; and Tap In, Tap Out, and Coming Back) with a button that opens your band's Morning Meeting deck. Grades 2–3 rooms see two buttons: grade 2 uses the K–2 lesson and grade 3 uses the 3–5 lesson.

Preserve the daily routines

Arrival at 7:15. Spark is a 3–5 minute independent task; then K–2 read and grades 3–8 use IXL. In the 2–3 deck, grade 2 reads and grade 3 uses IXL. The day's IXL codes are on the slide, top right, from IXL Week 11 (November 9–13). Announcements are around 7:37, followed by a reveal of two minutes or less. Morning Meeting starts at 7:45; on Friday, advance to Time for Friday Cypher and students report to the hallway once the announcement is made.

Use day keys 1–5 (Mon to Fri), arrows, bilingual read aloud, Repeat aloud for late arrivals, and Week view. Wednesday's reveal zooms out before the answer appears; reduced-motion mode reveals immediately. Thursday votes start at zero; explanations matter more than vote totals.

The week's through-line: a bar a day

Every reveal ends with a Chant of the Day (K–3) or Bar of the Day (4–8) on the day's focus. Read it once, have the class echo it, and post it by the door. On Friday, the five lines become the class's set for Friday Cypher. The scenes show the process the way students will see it: a reset at the desk, the calm walk to Reset 1, lap marks on a paper, Tap In support walking in while the lesson keeps going, the reflection sheet, and the Reset and Return ladder.

Ember videos feature characters and voices students see themselves in: Sesame Street and Plaza Sésamo (including Spanish-language calm-downs) and GoNoodle en español for K–3, and guided practices from Big Life Journal, Mindful Schools, Kid President, and Headspace teachers for 4–8. Each day's reflection practices a reset skill from the week. Preview each clip before 2:05; if YouTube is blocked, the board switches to the breathing circle.

Ember: 2:05 seated pack-up, 2:08 watch and settle, 2:13 reflect, then seated waiting. Keep the existing release order and times on the rail. Chromebook stays closed on the desk until the group is called; return it to the numbered slot, then leave. No lining up. Use the board's breathing fallback if streaming fails.

Equity sticks, talk moves, and LiveSchool

Every reveal follows Show, Think (ten silent seconds), Call (one or two equity sticks), Talk (30-second turn and talk if time allows). The daily keys below give the exact cold-call question and stem for each band. Talk moves: “Say more.” “Who can add on?” “What did your partner say?” Award LiveSchool points during the work period for the resets students make, said out loud: “Responsible: Amara fixed it right after the reminder.” “Respectful: Dante moved to his new seat calmly and started working.” Never award points for being quiet or finishing first.

Respect and privacy

Monday check-in slips stay private; the counselor collects them by 10:00 a.m. Feelings and readiness are information, not behavior grades. All week, students talk about the scenes on the slides and their own resets, never a classmate’s behavior, a removal, or a Restorative Room visit. If a student names a classmate, redirect in one calm sentence (“We only talk about our own choices.”), continue, and follow up privately. Safety always comes first: any unsafe behavior gets immediate adult support.

When behavior gets in the way

Correct privately and briefly, with proximity and the expectation: “Do Now first, then IXL.” Offer a frame instead of an explanation to a student who has not started. Do not hold a student out of the reveal or Morning Meeting to finish the Do Now, and do not use LiveSchool deductions for Level 1 behavior.

Grades K–1 · Daily teaching key

Monday November 9

Spark task: Weather pictures; private slip; optional adult check-in. Reveal: a ready body and “I’m ready.”

Reveal / key: This week we learn how to reset and come back to learning. Wave to a friend and say, “Good morning! I’m ready.”

Chant of the day (on the reveal): “Wait, breathe, raise my hand: learning keeps going, that’s the plan!” Say it once, then the class echoes it.

Differentiate / facilitate: Privately point or circle; an adult can scribe. Do not interpret a feeling from behavior. Reveal: model a ready body: feet on the floor, hands still, eyes up.

Equity stick (after 10 seconds of think time): “Show me a ready body. Who can say “I’m ready” in a calm voice?” **Turn-and-talk stem:** “Good morning! I’m ready.” (or a wave)

Ember video bridge: Watch how Elmo stops, calms down, and thinks. Breathe with him in your seat. (Calm Down and Think, Elmo)

Reflection: Draw what helps you wait for your turn. I wait by ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student’s own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Tuesday November 10

Spark task: Look at the picture. What is this friend doing to get calm? Point and tell a friend.

Reveal / key: She is taking slow breaths at her seat: in... and out. A reset can happen right in your seat.

Chant of the day (on the reveal): “Warning, new seat, reflection: three chances to reset!” Say it once, then the class echoes it.

Differentiate / facilitate: Accept breathing, sitting, resting. After the reveal, breathe in and out together three times.

Equity stick (after 10 seconds of think time): “What is this friend doing to get calm?” **Turn-and-talk stem:** “She is ___.”

Ember video bridge: Respira como un conejito. Breathe like a bunny in your chair, then draw. (Respiración de Conejito)

Reflection: Draw yourself fixing it after a reminder. I fixed it by ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Wednesday November 11

Spark task: Look closely. What do you see? Point to one clue and tell a friend.

Reveal / key: A reflection sheet! It asks how I feel, what happened, and my next move. An adult can read it with you.

Chant of the day (on the reveal): "How I feel, what I'll do: my next move gets me through!" Say it once, then the class echoes it.

Differentiate / facilitate: Accept faces, colors, lines, the paper. After the reveal, point to the feeling faces and name them together.

Equity stick (after 10 seconds of think time): "What clue did you see?"
Turn-and-talk stem: "I see ___."

Ember video bridge: Mira cómo Elmo nombra sus emociones. Name your feeling, then draw. (Elmo reconoce emociones fuertes con la ayuda de su mamá)

Reflection: Draw how you feel right now. I feel ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Thursday November 12

Spark task: Would you rather take a deep breath or ask for help when you feel stuck? Point to your choice.

Reveal / key: Both are great resets! Breathing calms your body. Asking for help gets you unstuck.

Chant of the day (on the reveal): “A helper comes, I reset, then I’m back. That’s a fact!” Say it once, then the class echoes it.

Differentiate / facilitate: Both answers are right. Practice both: one big breath, then a hand up for help.

Equity stick (after 10 seconds of think time): “Which one did you pick? Show me A or B.” **Turn-and-talk stem:** “I pick ___.”

Ember video bridge: Count and breathe slowly with your Sesame friends. Then draw your helper. (Count, Breathe, Relax)

Reflection: Draw a helper who helps you feel calm. My helper ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student’s own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Friday November 13

Spark task: I wonder: what does it mean to bounce back? Show me a bounce with your hands, then a big smile!

Reveal / key: Bouncing back means you try again after a mistake. Everyone can bounce back. Today at Friday Cypher, cheer for friends who keep trying.

Chant of the day (on the reveal): “Bounce, bounce, try again: I can do it, friend!” Say it once, then the class echoes it.

Differentiate / facilitate: Model a bounce and a smile; both count. Practice one cheer for trying again before Cypher.

Equity stick (after 10 seconds of think time): “Show me your bounce. What does bouncing back mean?” **Turn-and-talk stem:** “Bouncing back means ___.”

Ember video bridge: Listen to the song and sway gently in your seat. Then draw yourself trying again. (John Legend: Come Together)

Reflection: Draw yourself trying again. I tried again when ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Grades 2–3 · Daily teaching key

Monday November 9

Spark task: Weather pictures plus one ready move; private slip. Reveal: what helps you get ready to learn.

Reveal / key: This week: Reset and Return. Everyone needs a reset sometimes. What is one thing that helps you get ready to learn?

Chant of the day (on the reveal): "Every action has an impact: keep the learning intact!" Say it once, then the class echoes it.

Differentiate / facilitate: Grade 2 circles pictures; grade 3 finishes the sentence. Accept water, a breath, materials ready, reading the board.

Equity stick (after 10 seconds of think time): "What helps you get ready to learn?" **Turn-and-talk stem:** "___ helps me get ready."

IXL codes on the slide: Grade 3: Math 5HA V73 · Reading N7R 3X2. Grade 2 reads a book.

Ember video bridge: Let your body get calm with Elmo, one part at a time. Stay in your seat. (Monster Meditation #2: Goodnight Body with Elmo and Headspace)

Reflection: What is one thing that got in the way of learning today? What helped? ___ got in the way. ___ helped.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Tuesday November 10

Spark task: Look at the picture. Where is this student going, and how is she moving? Write one sentence.

Reveal / key: A seat change! She carries her paper to Reset 1, calm and quick. A new seat is a fresh start, not a big deal.

Chant of the day (on the reveal): "Calm and quick to Reset 1: a fresh start, then get it done!" Say it once, then the class echoes it.

Differentiate / facilitate: Grade 2 points and says; grade 3 writes one sentence. Connect to today's Morning Meeting: the seat change is step 2.

Equity stick (after 10 seconds of think time): "Where is she going, and how is she moving?" **Turn-and-talk stem:** "She is going to ___. She is moving ___."

IXL codes on the slide: Grade 3: Math DVB SGP · Reading XPG. Grade 2 reads a book.

Ember video bridge: Breathe like a snake: in slowly, then a long, quiet hiss out. Then reflect. (Snake Breath)

Reflection: Write about a reset you made today, big or small. I reset by ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Wednesday November 11

Spark task: Zoom in. What do these words tell you? What do you think this poster is for?

Reveal / key: The Reset and Return ladder: warning, seat change, written reflection, Tap In, Tap Out. Every step is a chance to reset and get back to learning.

Chant of the day (on the reveal): “Write it true: my next move keeps me here!” Say it once, then the class echoes it.

Differentiate / facilitate: Grade 2 reads the words with a partner; grade 3 writes a guess and a clue.

Equity stick (after 10 seconds of think time): “What do the words tell you?”
Turn-and-talk stem: “The words say ___. I think it is for ___.”

IXL codes on the slide: Grade 3: Math D9G · Reading 5HG. Grade 2 reads a book.

Ember video bridge: Escucha la meditación sobre ser amable. Breathe slowly, then write. (Sea amable: Meditaciones para niños)

Reflection: What will help you when you feel stuck? Check one from the reflection: a breath, help, a quiet minute, a dot. When I feel stuck, ___ helps me.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student’s own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Thursday November 12

Spark task: Would you rather have one minute to reset at your seat or a quick check from your teacher? Tell why.

Reveal / key: Both work! Both are on your reflection sheet as things that help. Knowing what helps you is a superpower.

Chant of the day (on the reveal): “Welcome back, clean slate: start right now, it’s not too late!” Say it once, then the class echoes it.

Differentiate / facilitate: Grade 2 points and says; grade 3 writes a reason. Connect: both are on the written reflection under “What will help me?”

Equity stick (after 10 seconds of think time): “Which did you pick, and why does it help you?” **Turn-and-talk stem:** “I pick ___ because ___.”

IXL codes on the slide: Grade 3: Math X66 · Reading 6J6. Grade 2 reads a book.

Ember video bridge: Listen to Big Bird and rest in your seat. Then write how you help a friend start fresh. (Big Bird sings “That’s Cooperation”)

Reflection: How can you help a friend start fresh? I can help by ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student’s own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Friday November 13

Spark task: Wonder: what makes a fresh start feel real? Make up a welcome-back cheer for a friend who is starting fresh. Do not use names.

Reveal / key: A fresh start feels real when nobody brings up the old mistake and everyone keeps working. A welcome-back cheer says: we’re glad you’re here.

Chant of the day (on the reveal): “Welcome back, we’re glad you’re here: fresh start, give a cheer!” Say it once, then the class echoes it.

Differentiate / facilitate: Grade 2 says the cheer; grade 3 writes it. Screen cheers for put-downs before anyone performs.

Equity stick (after 10 seconds of think time): “What is your welcome-back cheer, and why does it help?” **Turn-and-talk stem:** “Our cheer is ___. It helps because ___.”

IXL codes on the slide: Grade 3: Math KH6 · Reading U8W. Grade 2 reads a book.

Ember video bridge: Puff up like a pufferfish, then breathe out slowly. Then write your reflection. (Pufferfish Breaths)

Reflection: What is one reset move you will keep using next week? Next week I will ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Grades 4–5 · Daily teaching key

Monday November 9

Spark task: Energy scale 1–5; one small move; optional adult check-in. Reveal: your first reset move.

Reveal / key: This week: Reset and Return. Your energy is information. If something gets in the way of learning today, what is your first reset move?

Bar of the day (on the reveal): "Know the root, own the move, keep the learning in the groove." Say it once, then the class echoes it.

Differentiate / facilitate: Energy is information, not a grade. Push for an observable move ("put a dot and go on," "one slow breath," "ask for a quick check").

Equity stick (after 10 seconds of think time): "What is your first reset move if something gets in the way?" **Turn-and-talk stem:** "My first reset move is ___."

IXL codes on the slide: Grade 4: Math NVV · Reading MW8 YBU; Grade 5: Math RB9 QFQ · Reading CQA QTM.

Ember video bridge: Follow the breathing practice to let your worries float away. Stay seated, then reflect. (Breathing Away My Worries)

Reflection: Name one action today and its impact on learning, yours or someone else's. When ___, the impact was ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Tuesday November 10

Spark task: Look at the paper. What does each mark tell the student to do next? Which problem should the student start with, and what is your evidence?

Reveal / key: Lap marks: ✓ on task, ★ correct, ○ look again, ● start here. Start with number 4, the dot. A mark tells you what to do next.

Bar of the day (on the reveal): "Dot the hard one, keep it moving, every lap I'm improving." Say it once, then the class echoes it.

Differentiate / facilitate: Push for evidence from the marks. Name the dot strategy: put a dot on the hard one and go on.

Equity stick (after 10 seconds of think time): "Which problem should the student start with, and why?" **Turn-and-talk stem:** "Start with number ___ because the mark ___."

IXL codes on the slide: Grade 4: Math AKK · Reading C5Z; Grade 5: Math LPC 77G · Reading 87Z.

Ember video bridge: Take a mindful moment and notice your breath. Then write. (Mindful Moment: Mindfulness of Breath)

Reflection: At which step would you choose to reset, and how? I would reset at ___ by ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Wednesday November 11

Spark task: Zoom in. Use two clues to infer what this list is and why it is in order.

Reveal / key: The ladder: Level 1 in class (warning, seat change, written reflection), then Level 2 (Tap In, Tap Out). It is in order because each step comes only if the one before did not work. The written reflection is today's focus.

Bar of the day (on the reveal): "Honest page, real plan: right now I can." Say it once, then the class echoes it.

Differentiate / facilitate: Push for "Level 1" and the step names. Connect to today's Morning Meeting: Reset and Write.

Equity stick (after 10 seconds of think time): "Which two clues told you what the list is?" **Turn-and-talk stem:** "The clues ___ and ___ tell me this is ___."

IXL codes on the slide: Grade 4: Math C62 · Reading 78V; Grade 5: Math 69L · Reading RWE.

Ember video bridge: Breathe through each color of the rainbow. Let your body rest in your chair. (Rainbow Relaxation: Mindfulness for Children)

Reflection: Write a next move that gets you back to learning: Right now I will ___ so that ___. Right now I will ___ so that ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Thursday November 12

Spark task: When a problem is too hard, would you rather put a dot on it and go on, or ask for help right away? Give a reason and evidence.

Reveal / key: Both are smart. Dot it and go on keeps you working; your teacher comes back to the dots. Asking right away works when you cannot start anything. Choose what gets you back to learning.

Bar of the day (on the reveal): “Tap in, tap out, step back in: fresh begin.” Say it once, then the class echoes it.

Differentiate / facilitate: Accept either side with a reason. Name the dot strategy from Tuesday’s lap marks.

Equity stick (after 10 seconds of think time): “Which did you choose, and what is your evidence?” **Turn-and-talk stem:** “I would rather ___ because ___.”

IXL codes on the slide: Grade 4: Math DP8 · Reading X7Z; Grade 5: Math U2V · Reading CQC.

Ember video bridge: Think about how kindness helps someone start fresh. Breathe, then write. (Coloring My World with Kindness)

Reflection: What does a strong return to class look like? A strong return is ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student’s own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Friday November 13

Spark task: Wonder: athletes and artists mess up in front of crowds. What do the best ones do in the next ten seconds?

Reveal / key: They reset fast: a breath, a quick note to self, back in the game. No long excuses. The next play is the one that counts. Same in class.

Bar of the day (on the reveal): “Ten seconds later, I’m back in the game. Reset fast, stay in my lane.” Say it once, then the class echoes it.

Differentiate / facilitate: Collect reset moves on the board and carry them into Friday Cypher.

Equity stick (after 10 seconds of think time): “What do the best ones do in the next ten seconds?” **Turn-and-talk stem:** “In the next ten seconds, they ___.”

IXL codes on the slide: Grade 4: Math HDS · Reading YED; Grade 5: Math K69 · Reading MCF.

Ember video bridge: One last pep talk to end the week. Sit back, breathe, and name how you bounced back. (Kid President's Pep Talk for the World)

Reflection: When did you bounce back this week? Give one piece of evidence. I bounced back when ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Grades 6–8 · Daily teaching key

Monday November 9

Spark task: Ready level 1–5; emotion vocabulary; one controllable action. Reveal: a move that protects the learning.

Reveal / key: This week: Reset and Return. Every behavior has a root. Name one root that sometimes gets in your way, and one move in your control that protects the learning.

Bar of the day (on the reveal): "The root is mine to know. The impact is mine to own." Say it once, then the class echoes it.

Differentiate / facilitate: Roots stay private; accept written answers. Volunteers share the move only, never the root.

Equity stick (after 10 seconds of think time): "What move in your control protects the learning?" **Turn-and-talk stem:** "When ___ gets in my way, I will ___."

IXL codes on the slide: Grade 6: Math 6Z2 ZB9 · Reading SYH; Grade 7: Math MJQ SHV · Reading 38P UVJ; Grade 8: Math JXD GK7 · Reading UNX

LSW.

Ember video bridge: A short reset: breathe with the guide or simply observe. Stay seated, then reflect. (Mini Meditation: Breathe)

Reflection: What root got in your way today, and what move protected the learning? Keep the root private if you want. My move was ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Tuesday November 10

Spark task: An adult just walked into this class. Make a claim about why the adult is there, and argue why the teacher keeps teaching instead of stopping.

Reveal / key: This is Tap In: support comes into the room early so the lesson keeps going. The teacher keeps teaching so no one becomes an audience and everyone keeps learning.

Bar of the day (on the reveal): "Once it's said, the mark's the move. Reset early; nothing to prove." Say it once, then the class echoes it.

Differentiate / facilitate: Push for both: support arrives early, and stopping the lesson gives the moment an audience. Keep it about the picture.

Equity stick (after 10 seconds of think time): "Why is the adult there, and why does the teacher keep teaching?" **Turn-and-talk stem:** "The adult is there to ___. The teacher keeps teaching because ___."

IXL codes on the slide: Grade 6: Math 5T2 RHG · Reading F94; Grade 7: Math TDA · Reading HSM; Grade 8: Math HCP J48 · Reading LY6.

Ember video bridge: Practice the extended exhale: breathe out longer than you breathe in. Then write. (Breathing Technique for Anxiety and Focus: Practice Extended Exhale with Dora Kamau)

Reflection: Where on the ladder do you reset best, and why? I reset best at ___ because ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Wednesday November 11

Spark task: Zoom in. Make a claim about what these steps are. What can this detail tell you, and what can it not tell you yet?

Reveal / key: The crop showed only Level 2. The full ladder starts with three Level 1 steps in class, and Level 3 is administrative. The detail could not show you the goal: "Return is the goal."

Bar of the day (on the reveal): "Whole story, real move. Thinking beats performing." Say it once, then the class echoes it.

Differentiate / facilitate: Name what a crop leaves out: the earlier steps and the goal. Keep it on the poster, never on a real student.

Equity stick (after 10 seconds of think time): "What did the crop make you think, and what changed after the reveal?" **Turn-and-talk stem:** "At first I claimed ___. After the reveal, ___."

IXL codes on the slide: Grade 6: Math 5JV ZDZ · Reading R7J; Grade 7: Math WB7 · Reading ULC; Grade 8: Math Q2B · Reading 63P.

Ember video bridge: Follow the short practice to settle your attention. Then reflect. (A Short Meditation with Kessonga Giscombe)

Reflection: Rewrite a weak next move into a real one. Weak: ___. Real: Right now I will ___ so that ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student's own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Thursday November 12

Spark task: If you need a correction, would you rather get a quick private signal or a short private talk? Defend your choice and the other side.

Reveal / key: A signal is fast and keeps you out of the spotlight. A short talk helps when something needs explaining. Both are private on purpose: correct the action, not the person. Your reasoning matters.

Bar of the day (on the reveal): “Fell short? Bounce back. So I choose.” Say it once, then the class echoes it.

Differentiate / facilitate: Push for a counterargument. Connect to today’s Morning Meeting: the two-minute return is private on purpose.

Equity stick (after 10 seconds of think time): “Which did you choose, and what is the strongest argument for the other side?” **Turn-and-talk stem:** “I would rather ___ because ___. The other side would say ___.”

IXL codes on the slide: Grade 6: Math ZAV 7CZ · Reading MAL; Grade 7: Math LKZ · Reading HRH; Grade 8: Math ZYL · Reading 5LC.

Ember video bridge: Ground yourself: notice your feet, your seat, and your breath. Then write. (Grounding Exercise for Racing Minds with Dora Kamau)

Reflection: Write the first two lines you would say in a two-minute return. “___.” “___.”

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student’s own actions; no one names a classmate. If a student has no real example, the morning model is enough.

Friday November 13

Spark task: Wonder: in a cypher, an artist can stumble on a bar. What does a real one do next, and what does the crowd do?

Reveal / key: A real one keeps the flow, catches the beat, and comes back harder. A real crowd keeps the energy and does not clown the stumble. You fell short, but then you bounce back. So you choose.

Bar of the day (on the reveal): “Stumble on a bar, catch the beat, come back. Real ones reset; that’s the track.” Say it once, then the class echoes it.

Differentiate / facilitate: Keep examples general; no one names a classmate. Connect to Thursday’s Morning Meeting: the bounce back.

Equity stick (after 10 seconds of think time): “What does a real one do next, and what does the crowd do?” **Turn-and-talk stem:** “A real one ___. A real crowd ___.”

IXL codes on the slide: Grade 6: Math GBY · Reading FY8; Grade 7: Math 6V7 · Reading ARN; Grade 8: Math BRX · Reading GMT.

Ember video bridge: End the week by taking one deep breath together as a class. Then write your reflection. (Join the Global Deep Breath: Together, the World Takes One Big Pause)

Reflection: You fell short, but then you bounce back. Where will you bounce back next week? Next week I will bounce back in ___ by ___.

Look for: a concrete, observable choice the student made or will make. Reflections stay about the student’s own actions; no one names a classmate. If a student has no real example, the morning model is enough.
